Profile summary

Collaborative and detail-oriented Technical Writer with more than six years of experience in creating and managing high-quality industrial software and machine documentation, operating manuals, and user guides.

Currently leading a team at Avaya, managing up to four projects simultaneously within the Contact Center portfolio. Skilled at handling critical SME interactions, coordinating with cross-functional teams, and driving documentation initiatives under tight deadlines.

Strong expertise in technical writing, illustration, and document management, with a proven track record of mentoring junior writers, improving documentation processes, and contributing to style guide automation. Creative, resourceful, and effective in delivering high-quality content that meets organizational and customer needs.

Responsibility

Avaya:

Leading a team of writers, overseeing up to four projects at a time within the Contact Center portfolio (CCaaS and on-premise). Managing and facilitating critical SME interactions to extract complex technical information and ensure documentation accuracy. Coordinating multiple project timelines, balancing priorities, and ensuring timely delivery of documentation deliverables. Maintaining and updating the spell-checker (dictionary file), terminology checker, and auto-correct YAML files for the Oxygen-XML editor. Contributing to documentation process improvements, including automation of the style guide in Oxygen XML. Mentoring and training junior writers, ensuring quality standards and adherence to organizational documentation practices.

SystelUSA: I joined the company as their only Technical Writer. I set up their first template. I wrote the internal documentation and the user guides.

L&T technology services: Content management and technical writing.

PackSys Global (I) Pvt Ltd: Responsibility of preparing and updating manuals for machines. Collecting inputs from group companies for the changes required to be incorporated in the manual. Preparation of reports, planning sheet. Tracking the status of projects.

I E S L & I E S C P L: Responsibility of all the plant instrumentation. Maintaining sensors and their calibrations. Responsibility of assisting the maintenance of electrical panels and PLC. Responsibility of giving training to the new operators. Responsibility of looking after labor management, handling and receiving clients in the absence of the site in-charge.
